## Summary

Frontend Web Developer who focuses on building user-friendly frontends for websites. I am currently seeking new opportunity to contribute my skills and knowledge towards the advancement of the company along with my personal development.

---

## Projects

### E-commerce Website

- Built an e-commerce website using CSS, JSX, Redux-toolkit and React.
- The website features a responsive design that adapts to different screen sizes, a clean and modern layout and interactive elements such as hover effects and animations.
- Designed the layout of sign-in/out, wishlist, cart, orderlist and product categories pages.
- Handle user data and orders using api and database.
- Managed React state using redux-toolkit to transfer data across various pages.
- Persisted user data using local storage.

### Todo App

- A minimal web app to maintain our day-to-day tasks or list of everything that we have to do.
- User can select themes based on their preference.
- The user can choose whether tasks should have priorities or not. Additionally, when tasks have priorities, the user can set three levels of priority, e.g. High, Medium, and Low.
- Sorting tasks in reverse or normal order with alphabetical order or priority order is also possible.
- The task list can be modified, deleted, and completed tasks can be added to the completed list.

## Portfolio

- Built the entire website using CSS, JSX and React.
  - Used media query for responsive design.
  - To style the navigation bar while scrolling, I used vanilla javascript.
  - During the development of a website, I used React-router-dom and React-icon packages.
- 

## Skills

HTML 5, CSS3, JavaScript, React.js, Bootstrap, Redux/Redux-Toolkit, Version control (Git), GitHub, Responsive Design, C Language, JQuery

---

## Education

### Automobile Engineer

Parul University • Vadodara, Gujrat  
05/2022  
CGPA - 8.05

AMUV • Ambaji, Gujarat  
02/2018  
Percentage - 55%
